

Background

The workshop will examine the commercial opportunities arising from NDA, MOD and other sites.

It will begin by considering the planned spend on clean-up and decommissioning projects. It will then look at the specific types of work in the areas of contaminated land management and the management of clean, exempt and low activity wastes.

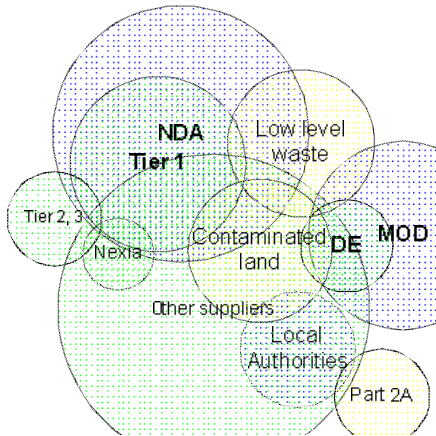

Moving on to how future work is likely to be structured, the workshop will explore how contracted projects will be packaged or bundled, the role of joint ventures and contract types/ fee structure. We will ask how the sharing of innovation will occur, whether the supply chain is up to the challenges and how it might need to adapt?

An understanding will be sought of the respective proportions of fixed-cost, shared-risk and framework agreements as well as the proportion of work to be placed by contractors with their affiliate organisations.

Supply chain communication and contract management procedures are also of interest. We will therefore look at how higher level contractors plan to keep their supply chains informed of developments, lead-in times and how projects will be advertised. We will also investigate contract management procedures, including who's who within the contracting organisations.

Finally competition aspects will be considered and best value (versus lowest price) and tender evaluation criteria discussed.

Why you should attend

Through the workshop you will have the opportunity to equip your company to deal with contracting, procurement and competition issues.

Against the background of the procurement strategies of NDA and MoD and their contractors you will be able to ask the question: *what advantages can a track record in SAFEGROUNDS and SD:SPUR good practice approaches offer within the procurement process?*

Following presentations from NDA, MOD and lower tier contractors, you will be able to discuss these highly relevant issues with other professionals - and share with them practical experiences in areas such as forming joint ventures, tendering, dealing with different contract types and participating in supply chain networks.

There will also be a note which will summarise the discussions. This will enable SAFESPUR to forward messages from the workshop to relevant decision-makers and enable you to distribute the information to colleagues.

Programme

10:00	Registration and refreshments	12:10	Construction sector experience of developing supplier relationships - Mott MacDonald
10:30	Chairman's welcome	12:30	Lunch
10:45	NDA procurement strategies Ron Gorham, NDA	13:30	Tier 2 Contractor's Experience of Procurement in the NDA Market – Trevor Jones, NUKEM

Terms and Conditions

This event is for SAFESPUR members only. Confirmation of your booking will be sent out by CIRIA by email two weeks prior to the event. CIRIA reserves the right to vary the programme and cancel the event in case of insufficient bookings.

The SAFESPUR Forum

The aim of the SAFESPUR Forum is to drive good practice, build effective markets and supply chains and support business benefits for members. SAFESPUR Forum members are non-Tier 1 nuclear and defence contractors and consultants.

Benefits of membership

SAFESPUR membership is company wide, providing all company employees with:

- free places at a minimum of 4 Forum meetings per year
- participation in 2 member newsletters per year
- inclusion of company information on the SAFESPUR Forum website (linked to SAFEGROUNDS and SD:SPUR websites which have over 10,000 hits per month)
- opportunities for members to produce good practice case studies
- opportunities and discounts for involvement in SAFEGROUNDS and SD:SPUR conferences.

Further information
